EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scot Wickhem on 25 January 2010.

The application has been amended as follows:

Claim 17 (line 20): ...outward from the stent wall by expansion of the [[predetermined]] pre-formed bulge region of the single...

STATEMENT OF REASONS FOR ALLOWANCE

Allowable Subject Matter

Claims 17, 19, 39, 40, 42-58, 60, 61, and 63 are allowed. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest, in combination with other limitations in the claims, a pre-formed bulge region positioned at a predetermined location between a distal and proximal end of a body region of a balloon, the bulge region protruding from the balloon when expanded and extends less than the entire circumference of the body region, wherein moveable members on a bifurcated stent are expandable radially outward from the stent wall by expansion of the pre-formed bulge region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

Art Unit: 3773

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Both Bramfitt et al. (U.S. Patent No. 5,935,135) and Mareiro et al. (U.S. Patent No. 6,258,099) disclose pre-formed bulge regions extending less than an entire circumference of the balloon, but fail to disclose a bifurcation stent positioned such that expansion of the pre-formed bulge region expands movable members of the bifurcation stent radially outward. Nothing in Bramfitt and Mareiro suggest the pre-formed bulged regions are capable of performing the functions as recited in the claims.
